

Tkchost 11 in 1 Trading Platform

Premium Installation & Setup Guide (With Visual UI Walkthrough)

Welcome

Thank you for choosing **The Kingsmen ICT Trading Platform** a modern, high-performance trading and investment solution built for scalability, automation, and profitability.

This premium guide now includes **visual references** to help you complete setup faster and without confusion.

System Requirements

- cPanel-enabled hosting account
 - PHP 8.2 or higher
 - MySQL database support
 - Minimum 1GB storage
 - Active domain name connected to your server
-

Step 1 — Prepare Your Files

Download your Tradexpromax package (ZIP file).

Screenshot Guide:

- Show: ZIP file on desktop (e.g., Tradexpromax.zip)
-

Step 2 — Access cPanel

Login via:

- <https://yourdomain.com/cpanel>
- or <https://yourhost.com:2083>

Screenshot Guide:

- Show: cPanel login page
- Show: cPanel dashboard after login

Step 3 — Database Setup

1. Open **MySQL Databases**
2. Create database
3. Create user
4. Assign user to database
5. Grant ALL PRIVILEGES

Screenshot Guide:

- MySQL Databases page
- Create Database form
- Add User form
- Privileges checkbox screen

Step 4 — Upload & Extract Files

1. Open **File Manager**
2. Go to **public_html**
3. Upload ZIP file
4. Extract contents

Screenshot Guide:

- File Manager interface
- Upload button
- Extract option menu

Step 5 — Configure System (.env File)

Edit `.env` file with your credentials:

```
APP_ENV=production APP_DEBUG=false APP_URL=https://yourdomain.com
```

```
DB_DATABASE=your_database_name DB_USERNAME=your_database_user  
DB_PASSWORD=your_database_password DB_HOST=localhost
```

Screenshot Guide:

- .env file opened in editor
- Highlight DB and APP fields

Automation Setup (Cron Jobs)

Command:

```
wget -q -O /dev/null "https://yourdomain.com/allcron?token=tradex-cron-2026"
```

Set interval to every 3–5 minutes.

Screenshot Guide:

- Cron Jobs page in cPanel
 - Command input field
-

Admin Access

- URL: https://yourdomain.com/adminlogin/%20validate_admin
- Email: script@tkchost.com
- Password: (1Two3.com)

⚠ Change credentials immediately.

Screenshot Guide:

- Admin login page
 - Admin dashboard overview
-

Platform Configuration

Go to: Settings → App Settings

Configure:

- Site name
- Email
- General settings

Screenshot Guide:

- Settings page
 - App settings tabs
-

Trading API Integration

TwelveData Setup

1. Create account at <https://twelvedata.com>
2. Copy API key
3. Enter in Admin Panel → API Configuration
4. Test and save

Screenshot Guide:

- TwelveData dashboard
 - API key section
 - Your admin API configuration screen
-

Live Chat Integration

File: `resources/views/layouts/livechat.blade.php`

Add your chat script (e.g., Smartsupp)

Screenshot Guide:

- Smartsupp dashboard
 - Copied script section
 - Blade file editor view
-

Security Recommendations

- Enable SSL (HTTPS)
 - Use strong passwords
 - Backup regularly
 - Protect `.env` file
-

Final Notes

This visual guide ensures even non-technical users can install The Kingsmen ICT Script confidently.

OPTIONAL: Want Done-For-You Setup?

If you prefer a **fully installed and configured system**, offer your clients:

- Installation service
- Hosting setup
- API configuration
- Branding customization
